***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 10-16, and 19, drawn to an apparatus which is an ice confection machine.

Group II, claims 17 and 18, drawn to a method for making an ice cream product.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in the groups are the mould cavities arranged on a track on an endless belt where there are uneven numbers of mould cavities. The instant claims are not special because they are shown in the prior art. U.S. Patent Number 4,819,449 teaches the mould formation, endless belt, and uneven numbers as claimed in claims 10 -19. The reference specifically teaches this mechanism for making ice cream and other ice candy confections.

2. A telephone call was made to Mr. Dan Gibson on November 13, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
